

10 Th Global Warming International Conference
Climate, Environment and Health for the 21 st Century
May 5-8, 1999 : Fuji-Yoshida, Yamanashi, Japan

The GW Conference

After The UNCED in Rio de Janeiro in 1992 and The COP 3 in Kyoto in 1997, the participants in non-governmental and governmental organizations will define the efforts to mitigate global warming and environmental pollution. The Yamanashi Institute of Environmental Sciences and the Global Warming International Center are delighted to host GW 10 at the foot of Mt. Fuji in Fuji-Yoshida, Yamanashi, Japan. Everyone enjoy delicious sight of Mt. Fuji and Cherry Blossom.

All of the participants can exchange point of views, share research results, start cooperation on projects, and meet with experts various fields in the world.

Host Organization

Organizing Committee of Global Warming International Conference

Conference Chairpersons

Masami IRIKI, Yamanashi Institute of Environmental Sciences (YIES)

Fuji-Yoshida, Yamanashi, Japan

Sinyan SHEN, Global Warming International Center (GWIC)

Woodridge, Illinois, USA

Sessions and Topical Highlights

(I) Global Warming and Climate Change

1. Emission Scenarios, Global Warming and Climate Change
2. Impacts on Ecosystems, Resources, Agriculture, Hydrology and Energy
3. Impacts on Public Health and Biometeorological Aspects of Adaptation
4. Strategies for Mitigation and Policies for Society

(II) Sustainable Environment and Health for the 21 st century

1. Environmental Assessment and Development
2. Environmental Pollution and Health
3. Rural Communities and Health
4. Environmental Conservation and Pollution Control
